TERMS AND CONDITIONS

Last updated: 2026-10-20

Article 1 — Acceptance and Scope

1.1 These Terms and Conditions (the “Terms”) form part of the legal documentation of the Service and govern the access to and the use of the website published at https://testpages-simple.pages.dev (the “Site”) and of its claim and delivery functions. By accessing the Site, connecting a Wallet or requesting the minting of an SBT, you accept these Terms in their entirety. If you do not agree with them, you must abstain from using the Service.

1.2 The Service is the demonstration page of the MellonKeyfs documentation system, whose companion edition is published at mellonkeyfs.pages.dev (version 2.1.0) and whose development profile is published at github.com/fabiola-serralunga. Its sole function is to allow a Visitor to claim (mint) a Soulbound Token on the Base Sepolia Testnet and, after an automated verification of entitlement, to obtain the delivery of the Digital Asset linked to that token.

1.3 The Terms must be read together with the Privacy Policy and the Cookie and Local Storage Notice, which form an integral part of the legal documentation of the Service. The Privacy Policy prevails on all matters relating to the processing of Personal Data.

Article 2 — Definitions

2.1 Terms written with a capital initial have the meaning given to them in this documentation. In addition to the definitions set out in Article 2 of the Privacy Policy, which apply to these Terms, the following definition applies: “Digital Asset” means the file that is linked to an SBT through its metadata and that is delivered to an entitled claimant after verification, hosted in a managed bucket of Cloudflare, Inc.

Article 3 — Adquisition of Digital Asset

3.1 The Digital Asset is a digital artwork provided for personal enjoyment. The Operator makes no representation and gives no warranty as to the monetary, commercial or investment value of the Digital Asset. The Digital Asset does not confer any ownership interest in the Operator, any right to revenue, any voting right, or any expectation of profit, and is not a

financial product, security or investment instrument. The Digital Asset is provided 'as is', without warranty of any kind to the maximum extent permitted by applicable law.

3.2 The claim flow consists of the following steps: (a) you connect your Wallet through the Wallet Provider of your choice; (b) your Wallet signs a message containing a date and time; (c) the SBT is minted by a smart contract deployed by the Operator on the Base Sepolia Testnet, or the ownership of an existing token is verified; (d) the delivery function verifies, in memory and for a few seconds, the signature and the on-chain ownership of the token; and (e) the Digital Asset is delivered with explicit instructions that prevent the browser from storing it in cache. No account, e-mail address, payment or personal information is requested at any step.

3.3 The delivery of a Digital Asset to an entitled claimant confers on that claimant a perpetual, worldwide, non-exclusive and non-transferable licence to access, download, store and use the Digital Asset for personal, non-commercial purposes. This licence terminates automatically, without notice, upon material breach of these Terms by the claimant. All rights not expressly granted are reserved by the Operator.

3.4 All payments made in exchange for a Digital Asset are final. Due to the immediate nature of digital delivery, no refund is available once the Digital Asset has been delivered or made available for download, to the maximum extent permitted by applicable law.

3.5 The Service is maintained for technical, demonstrative and educational purposes: it shows the end-to-end operation of the tokenisation of a digital asset, the delivery of the file that contains it and its use as a record of provenance, authorship and acquisition. It has no commercial purpose.

Article 4 — No Affiliation; Third-Party Names

4.1 The Service is not affiliated with, endorsed by or sponsored by Cloudflare, Inc., Alchemy Insights, Inc., Base or its infrastructure operators, the Arweave Network, the AR.IO network, Permanent Data Solutions, Inc., the AR.IO Foundation or any Wallet Provider. All third-party names and marks are used solely for identification purposes and remain the property of their respective owners.

4.2 The SBTs minted through the Service have no economic value, are not listed on any marketplace and are not offered for sale. Their existence on a test network does not imply any relationship with any token project or issuer other than the Operator.

Article 5 — Service Provided "As Is"; Testnet Demonstration

5.1 The Service is provided "as is" and "as available", without warranties of any kind, whether express or implied, including warranties of merchantability, fitness for a particular purpose and non-infringement, to the fullest extent permitted by law.

5.2 The SBTs are minted on the Base Sepolia Testnet, which is a test and development environment. Tokens recorded on that network have no economic value, are not convertible into fiat currency, do not represent patrimonial rights and do not constitute financial assets or investment instruments. The sole function of the demonstration is to show the end-to-end tokenisation of a digital asset, the delivery of the file that contains it, and its implementation as a record of provenance, authorship and acquisition.

5.3 The smart contracts that emit the SBTs have not been audited by independent third parties. Their code may contain bugs, vulnerabilities or undetected defects that could affect the operation of the tokens. To the extent permitted by law, the Operator is not liable for losses derived from errors in the code of the smart contracts.

5.4 The loss, theft or compromise of your Wallet implies the loss of the SBT and of access to the linked Digital Asset. The non-transferable nature of the SBT prevents its recovery through transfer from another Wallet, and the Operator has no technical ability to re-issue an SBT to a Wallet other than the one that originally minted it.

5.5 You acknowledge and accept the risks described in this Article by minting an SBT or requesting the delivery of a Digital Asset. If you do not agree with any of these conditions, you must abstain from using the claim and delivery functions.

Article 6 — Acceptable Use

6.1 You agree to use the Service lawfully and only for the purposes described in Article 3. In particular, you agree not to: (a) abuse, overload or interfere with the delivery function or the infrastructure of the Providers; (b) use automated means to mint tokens in bulk or to harvest the Site; (c) circumvent, or attempt to circumvent, the security measures of the Site, including the bot management and clearance functions of Cloudflare; (d) obtain, or attempt to obtain, a Digital Asset without holding the corresponding SBT, including by reverse-engineering the verification flow; (e) attempt to identify, track or deanonymise the Operator or other users; or (f) use the Service for unlawful, fraudulent or harmful purposes or to introduce malicious code.

6.2 The Operator may suspend access to the Service, without prior notice and to the extent technically possible, where these Terms are breached or where the security of the Service requires it.

Article 7 — Intellectual Property

7.1 The code, design, texts and legal documentation of the Site are the intellectual property of the Operator and are protected by applicable law. Third-party names and marks referred to in this documentation remain the property of their respective owners.

7.2 The delivery of a Digital Asset to an righted claimant conferts on that claimant a perpetual, worldwide, non-exclusive and non-transferable license to access, download, store and use the Digital Asset for personal, non-commercial purposes. This licence terminates automatically, without notice, upon material breach of these Terms by the claimant. All rights not expressly granted are reserved by the Operator.

7.3 The metadata of the SBTs and the on-chain records of the Base Sepolia Testnet are public by design. The imagery displayed by the Site is published on the Arweave Network and, once confirmed, is permanent and cannot be removed, as described in the Privacy Policy. This permanence is inherent to the storage network and is accepted by using the Service.

Article 8 — Limitation of Liability

8.1 To the maximum extent permitted by applicable law, the Service is provided on an "AS IS" and "AS AVAILABLE" basis, without warranties of any kind. Since the Service is provided entirely free of charge for portfolio and demonstration purposes, the Operator shall have alternative and absolute ZERO liability (USD 0.00) for any damages, losses, or claims arising out of or in connection with the use or inability to use the Site or the API. You use the Service entirely at your own risk.

8.2 To the maximum extent permitted by applicable law, the Operator shall not be liable for any indirect, incidental, special, consequential or punitive damages, nor for any loss of data, of opportunities or of anticipated benefits. Without limiting the foregoing, the Operator is not liable for: (a) the behaviour, resets or discontinuation of the Base Sepolia Testnet or of the Arweave Network; (b) defects in the unaudited smart contracts; (c) the loss, theft or compromise of a Wallet, and the consequent loss of an SBT and of access to the linked Digital Asset; (d) the unavailability or errors of the RPC Providers, the Gateways, the Wallet Providers or the Cloudflare infrastructure; or (e) the content or practices of third-party websites.

8.3 Nothing in these Terms limits or excludes liability that cannot be limited or excluded under applicable law, including liability for intent or gross negligence, for death or personal injury, or the mandatory consumer protections of the place of residence of the Visitor.

Article 9 — Third-Party Services and Links

9.1 The Service relies on third-party services described in the Privacy Policy: the Wallet Provider you select, the RPC Providers, the Cloudflare infrastructure and the Gateways. Those services are governed by the terms and privacy policies of their respective operators, which you accept independently of these Terms.

9.2 The Site contains two external links: (1) mellonkeyfs.pages.dev, the companion edition of the MellonKeyfs system; and (2) github.com/fabiola-serralunga, the development profile of the Operator. By following an external link you leave the Site and become subject to the terms and privacy policy of the destination. The Operator does not control and is not responsible for third-party websites.

9.3 The Site does not embed, by means of iframes or similar technologies, any external service. All interaction with third-party properties takes place through outgoing links or through the technical communications described in the Privacy Policy, and no third-party content is loaded into the pages of the Site.

Article 10 — Availability, Modification and Discontinuation

10.1 The Service is a static portfolio project. It is provided without any support obligation and may be modified, suspended or discontinued at any time and without notice.

10.2 The Operator may redeploy, reset or replace the smart contracts of the demonstration on the test network. Such operations do not generate any obligation of migration, re-issue or compensation, given the absence of economic value described in Article 5.

Article 11 — Governing Law and Jurisdiction

11.1 These Terms are governed by the laws of Argentina, without prejudice to any mandatory provision of the place of residence of the Visitor. Any dispute arising from or in connection with these Terms shall be submitted to the competent courts of Ciudad Autónoma de Buenos Aires.

11.2 Where mandatory consumer protection law of the place of residence of the Visitor confers a more favourable jurisdiction or protection, that law prevails to the extent of its mandatory scope.

Article 12 — Miscellaneous

12.1 If any provision of these Terms is held to be invalid or unenforceable, the remaining provisions will remain in full force, and the invalid provision will be replaced by a valid provision that most closely reflects its intent.

12.2 These Terms, together with the Privacy Policy and the Cookie and Local Storage Notice, constitute the entire agreement between you and the Operator in relation to the Service and supersede any prior arrangement on the same subject matter. No waiver of any provision is effective unless made in writing.

12.3 You may not assign your rights or obligations under these Terms. The documentation is drafted in the English language; only a translation published by the Operator would be provided for convenience, and the English version would prevail in case of divergence.

Article 13 — Changes to the Terms

13.1 The Operator may update these Terms at any time in order to adapt them to legislative developments, to changes in the Service or for any other justified cause. The current version is the one published on the Site, with its effective date and version number recorded in the document control table of this documentation.

13.2 Because the Service is a static portfolio project, no material expansion is planned. Where a change materially affects the rights of users, a prominent notice will be published on the Site for a reasonable period. Continued use of the Service after the effective date of a change constitutes acceptance of the updated Terms.

Article 14 — Contact

14.1 Any question relating to these Terms may be directed to the Operator at curses.trinity426@slmails.com. Enquiries relating to the processing of Personal Data are governed by the Privacy Policy.
